Concept/Term	Definition
Gross-to-Net Calculation	Payroll computation from gross earnings to final net pay. Includes taxes, deductions, and contributions.
Posting to Finance	Sends payroll results to SAP Finance for accounting. Uses symbolic accounts to map wage types.
Symbolic Account	A logical account that links wage types to G/L accounts. Helps in financial postings.
General Ledger (G/L) Account	SAP Finance account that records payroll expenses and liabilities. Mapped via symbolic accounts.
PA30	A transaction used in on-premise SAP to maintain HR master data. ECP uses a similar backend for updates.

Concept/Term	Definition
Time Off	EC feature to manage employee leaves. Integrated with payroll to calculate leave balances and payouts.
Advance Pay	A special payment processed before regular payroll. Handled via off-cycle processing.
Payroll Driver	Program that executes payroll runs. Usually run using transaction PC00_MXX_CALC.
Payroll Log	Detailed output of the payroll run. Helps identify how wage types and deductions were processed.
ECP Pre-Payroll Validation	Checks for data inconsistencies before payroll run. Helps avoid runtime errors or incorrect results.

Concept/Term	Definition
One-Time Payments (IT0015)	Used for ad-hoc payments like bonuses. Applies only to a specific payroll period.
Pay Statement	The employee-facing payslip generated after payroll. Contains earnings, deductions, and net pay.
Payroll Calendar	Schedule for payroll processes, including cutoffs and pay dates. Defined per payroll area.
Check Register	Report listing all employee pay details for a payroll run. Used for verification before payout.
Payroll Reconciliation	Process of matching payroll results with expected values. Helps ensure correct pay before posting.

Concept/Term	Definition
Integration Center	Tool in EC to build and manage simple outbound integrations. Can be used for third-party payroll exports.
Data Replication Monitor	Monitors employee replication status from EC to Payroll. Highlights issues and success rates.
Country-Specific Configuration	Localizations applied to schemas and data models. Ensures compliance with local payroll laws.
Termination Processing	Handles final payroll and payouts for employees leaving. Includes notice pay, leave encashment, etc.
Rehire Processing	Specific logic to handle employees rejoining. Impacts seniority, accruals, and payroll eligibility.

Concept/Term	Definition
Payroll Authorization	Controls access to payroll data and processing steps. Based on roles and permissions in EC and ECP.
Data Privacy Compliance	Ensures payroll systems meet regulations like GDPR. Involves encryption, access control, and audit logs.
Event Reason	Defines why a job or pay change occurred. Helps trigger workflows and data replication for payroll.
Employee Central Foundation Objects	Include legal entities, cost centers, pay groups. Crucial for payroll structuring and reporting.
Position Management	Aligns positions to job structures. Impacts compensation, pay scale, and payroll results.
