NOTE: If you get a Keep Layers warning when opening the class templates in your program, no worries. Just click Keep Layers and proceed as usual.
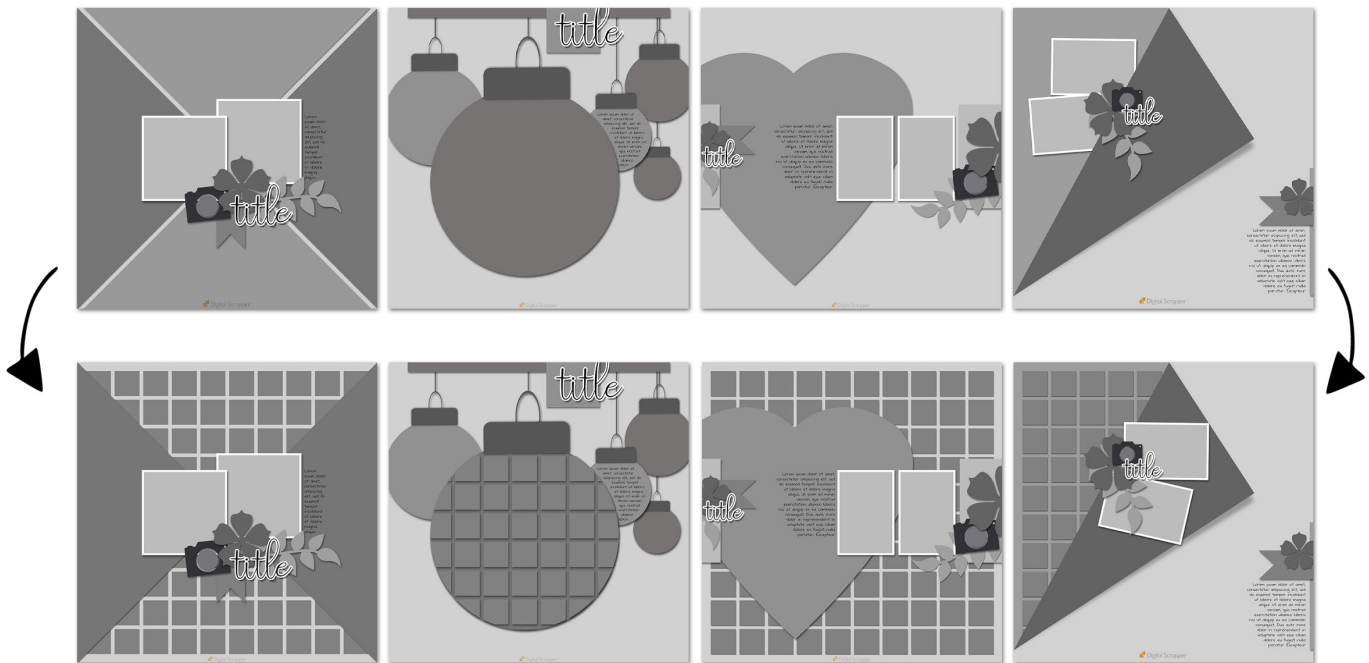

Tip #1: Use the Templates As Usual
- Always duplicate the template before starting to use it.
- Clip paper to the paper clipping masks.
- Clip photos to the photo clipping masks.
- Feel free to hide and move layers as much as you'd like.

Tip #2: Use the Templates Along with the Story Grid

- Option 1—Place the Story Grid directly above the background paper in the Layers panel. You may need to hide or rearrange a few layers in order to achieve good results. See templates 1, 3 and 4 below for examples.
- Option 2—Use a shape in the template to create a selection outline, then use the selection outline to mask the Story Grid (as shown in the Variations: Shaped lesson). See template 2 below for an example.
