

Supervised Visitation Monitor Training

Helping Families- Child Development for Supervised Visitation Monitors

Hi. Welcome to part thirty-four of the Supervised Visitation Monitor Training, brought to you by Family & Children's Counseling Services, Inc.

In this segment, we will discuss child development, specifically developmental needs. Please see the video for pictures and more description.

Before moving on to the next segment, answer the following questions:

- 1) Which level do you think most of our clients' children are in?
- 2) Think about the stages of development the child has been through and is currently in. How does this relate to the Prenatal Stage, the Physical domain, the Cognitive domain and the Psycho-social domain?
- 3) Can you see the connection between the stages and domains we just learned about and the Supervised Visitation experience?

Thank you for watching. I'll see you again at the next video, the Developmental Needs of Children.

Family & Children's Counseling Services, Inc. is a California LMFT non-profit Corporation directed by Melinda Haynes, MA, LMFT 102308.
