Scrapping with Filters, Stamp & Paint

Challenge 1: Element Challenge (Part 1)

TRANSCRIPT

Welcome to challenge number one, the element challenge. In this challenge, I'm asking you to open the fall leaf from the class downloads. Use the same instructions from Section 1 of this class that will show you how to apply the Stamp filter, apply the Palette Knife filter, paint in color, and then mask away boundary lines.

For your reference, here is my completed Stamp & Paint leaf. See how close you can come to duplicating the image that I have here. This image is included in the manual for this video so you can reference it as you work. Here are a few things about this finished image that make it look more artistic and pretty. Notice how the boundaries of the element were broken up by masking them away. This creates a more unfinished artistic look. Also, notice how only parts of the entire element were colored back in, specifically areas of the veins of the leaf.

When you're finished with the Stamp & Paint technique, take the challenge a bit farther by placing your image on a 7 X 5 greeting card using the paper and word art from the class downloads. Once you finish your design, move onto part two of this challenge to see step-by-step how I created the look for my leaf. Have fun playing. This is Jen White with Stamp & Paint.
