Subject: Re: Pips Predator Mentoring: Your 12 Week Course

Good morning Alpesh, I have been on the course for most of this year and I am finding it very interesting to say the least. My career has been in engineering for the last 40 years and it is still going to take me a while to get more proficient and confident with this.

I have also been following your twice weekly stock market updates and have been blown away with the information you have provided. Recently I have been able to check my own pension provided by Legal \& General. This was provided by my employer. The information was shocking $20 \%$ growth between 2012 and 2022. As you can imagine I have now taken steps to remove this and control the funds myself, currently I can get $5 \%$ interest at the least.

As I said earlier I had been following your weekly report and I have invested very limited funds but have seen returns of around $20 \%$ this year.

My question is, can I join the stock market group and how much would it cost me extra per month.

- Based on the growth percentages provided in the image for the 10-year period, here's what someone starting with $£ 100,000$ in their pension would have now in each index:

NASDAQ 100 (NDX): The investment would have grown by 382.22\%, resulting in a final value of approximately $£ 482,220$.

S\&P 500 (SPX): The investment would have grown by 166.17\%, resulting in a final value of approximately $£ 266,170$.

MSCI United Kingdom Index (EWU): The investment would have grown by $24.54 \%$, resulting in a final value of approximately $£ 124,540$.
