

WHAT TO WEAR

“I want your confidence and what you say to make a statement, not your outfit” -Nichole Harrop

Be mindful of:

Lipstick color- so it doesn't get on your teeth

Perfume- don't spray any more than you do normally

Jewelry- one statement piece if you want to be more bold, also be mindful of your bracelets if they are distracting with the sound

Scarves- ideal to not wear one, but if you do, try not to cover up your full neck as you may come off as guarded or cold

Makeup- know your audience, keep in mind 9-5 vs a night out on the town

Always remember that this is an opportunity to show up as your most authentic self while also being polished and professional.

Pinterest is a great resource for what to wear once you have spoken with the hiring manager or contact at the prospective company. When in doubt, dress slightly above where you think the standard is.
