issue

Complex setup and training with **steep learning curve**

Complicated functions **hindering** actual site implementation

## Easy to learn, set up, and use

- ✓ Intuitive design for ease of use
- ✓ One click to extract data with AI OCR
- ✓ Offline mode without limitations

The screenshot displays the Glodon software interface on a laptop screen. The top navigation bar includes 'Sample Project A', 'Gsite Pro', and various menu items like 'Dashboard', 'Album', 'BIM Models', 'Documents', 'Drawings', 'Forms', 'Issues', 'Inspections', 'RFIs', and 'Site Diary'. Below the navigation bar, there's a breadcrumb trail: '< C012 Performance Notice / Instruction'. The main content area shows a form titled 'Circle to indicate card issued'. The form contains several sections: 'Reason notice issued' with a text input field; 'Corrective action required' with a text input field; 'YELLOW CARD' with a text input field; 'Name' and 'Date' fields (the 'Date' field is a date picker); and a 'Text' field at the bottom. An 'Edit' button is located in the top right corner of the form area. The bottom left corner of the screen shows a 'Sign Off' button.

## Easy Customisations

Drag-and-Drop Custom Forms

Granular Permissions & Security

Automated Workflow Integration

Thank You
