Brian Gray, MD, FACS, FAAP

David Hughes, MD, FACS

Daniel Nelson, DO, FACS

Michael Sabel, MD, FACS

Hunter Underwood, MD

Timothy Vreeland, MD, FACS

Welcome to Behind the Knife Premium General Surgery Oral Board Audio Review. We are thrilled you have chosen Behind the Knife to help you prepare; we have the utmost confidence that our review material will have you ready to DOMINATE the exam.

This oral board review course includes 92 scenarios that meticulously cover 115 SCORE core topics. Each scenario includes two parts. Part A is a perfectly executed oral board scenario that mimics the real thing. Scenarios are 5 to 7 minutes long and include a variety of tactics and styles. If you are able to achieve this level of performance in your preparation you are sure to pass the oral exam with flying colors. Part B introduces high-yield commentary to each scenario. This commentary includes tips and tricks to help you dominate the most challenging scenarios in addition to practical, easy-to-understand teaching that covers the most confusing topics we face as general surgeons. We are confident you will find this unique, dual format approach a highly effective way to prepare for the test.

So, why did we take this on? Well, we simply were not happy with the other oral board prep courses out there. First off, they are ridiculously expensive. No one should have to pay that much. Second, their content is subpar and out of date. So, we took matters into our own hands. This oral board review course was designed to not only outperform the competitors, but also save you hundreds of dollars.

Don't forget to check out <u>www.behindtheknife.org</u> for more oral board review material. Click on listen, series, then oral boards to access more than 20 additional episodes, including a 10-part review series and supplementary mock oral board scenarios. You can also sign up for our newsletter, register for free category 1 CME, and even purchase some merch. For regular updates, follow us on Twitter @behindtheknife and Instagram @behindtheknifepodcast.

Finally, it is important to recognize that the creation of over 92 high-quality scenarios was a team effort. In addition to the work put in by Behind the Knife directors Jason Bingham, Patrick Georgoff, Kevin Kniery, and John McClellan, significant contributions were made my Drs. Jonathan Abelson, Brain Gray, David Hughes, Dan Nelson, Michael Sabel, Hunter Underwood, and Tim Vreeland. We also received invaluable support from our amazing administrator Lisa Georgoff. As with all Behind the Knife content, the information included in this course is for educational purposes only.

<b>v</b>	Case Number	Case Name	SCORE Patient Care Category	Author	Examiner	Examinee
	0	Course Introduction				
	1	Rectus Sheath Hematoma	Abdomen - General	Kniery	Kniery	Bingham
