

Introduction

Thank you so much for enrolling in my Home Prescribing Course.

The course is to empower you to learn to use some of the common homeopathic remedies at home, helping you and your family, including animals (yes, they respond in the same way we do!) through acute situations.

Acute situations can include an injury (you can even help a severe one, although I suggest extra help from an experienced homeopath would also be needed depending on how bad it is), a puncture wound, a sting, a bite, an abscess, a burn, a cold, a cough, a fever, the flu, sunburn, a teething toddler, pain, a gastro, a splinter, stiff joints and much more.

The course contains 54 modules. These modules are divided into five different sections for your convenience in accessing the information later.

Most of the modules consists of a video and two files - one on the materia medica/a remedy and one on an aspect of philosophy. Many also include case studies and/or a quiz.

It is essential in your learning process, to have your queries answered as they arise. So ask, always ask, before they become blocks to your further learning. There is a comment section for this so everyone can learn from your questions.

Similarly, I would love to hear your feedback about this course. So please feel free to share your feelings, honestly!

I look forward to working with you. And I hope this course is the start of an exciting journey for you.

Warm regards

Madeleine
