

USING THE TEACHABLE DASHBOARD (Practical lesson 4)

HOW TO EMBED A VIDEO IN YOUR COURSE

1. Choose your course and go to “curriculum” on the dashboard.
2. Click on “**Add New Lecture**” and write a title befitting the video that you intend to add e.g. “Jesus on the Cross.”
3. Add text instructing the students to watch the video, e.g. “*Please watch the video below about Jesus on the Cross.*”
4. You can either add a video from your computer or embed a video from the internet e.g. From YouTube.

Embedding a video from YouTube.

5. Choose the video that you want to embed in your course and hit the share button.
6. You will see many options of sharing to various social media platforms like Facebook, Twitter, Reddit etc. and an “**embed**” option (with two arrows facing opposite directions)
7. Click on the “**embed**” option and copy the long code (link), appearing below the words “**Embed Video,**” on the side of the video.
8. Go back to your course, where you want to add the video.
9. On the instructions panel next to the dashboard, click on “**Add Custom Code**” and a black screen will appear.
10. Click within the black screen and paste the code that you copied from YouTube, earlier.
11. Click on the **Add Custom Code** button, below the black screen, to embed your video
12. Click on the “**Preview**” button on the top right of your screen to see how the embedded video looks in your course.
