

Weekly Challenge

Razor Pages User Logic

Primary Challenge

Create the front-end of the razor page we created for the soda machine in the last challenge. Ensure that you wire up each post method and verify that every action works properly.

Bonus Challenge

Give the page some polish using the basic Bootstrap layout and color options. Make use of the style.css if needed but don't use custom colors or themes. Use the basic theme to get used to it.

“Practice makes the master.”
