

Demo accounts for CFDs

So far, we have used MetaQuotes as our broker. Unfortunately, MetaQuotes does not offer CFDs (except gold and silver). Thus, we need to switch it up.

We will cover how to choose a broker for live trading in a later chapter.

For now, we're just interested to open demo accounts, not live trading accounts. Thus, we can be less stringent with our broker selection.

Choose your broker

I personally use IC Markets and Pepperstone for live trading. However, the demo account signup process for Pepperstone is slightly more intensive, so I don't recommend that.

ThinkMarkets is another option. They have a wider range of assets to choose from.

I'll list the available assets for IC Markets, Pepperstone and ThinkMarkets for your reference. Note that these are for MT4 (not MT5).

Note that we are not endorsing these brokers.

Here is the asset list for IC Markets (next page):

Signing up for your broker

We will go through the signup process for IC Markets and ThinkMarkets.

IC Markets

Step 1:

Go to <https://www.icmarkets.com/au/en/open-trading-account/demo>. Fill in your personal details.

Your email needs to be accurate as they will email you your login details. If you unintentionally mistype your mobile number however, you'll still get access to the demo account.

MetaTrader 4 is the most popular trading platform in the world. The MetaTrader 4 software offers a feature-rich, user-friendly interface and a highly customisable trading environment, designed to fulfil all your trading needs and enhance your trading performance. Charting functionality and innovative order management tools ensure that you can monitor your positions fast and efficiently.

Download MT4

Your login details will be sent to your email.

Note that you can login to their demo account using MetaQuotes' MT4. Go to "Open an account" and add ICMarkets to the list. Then login as usual.

However, I don't recommend this. It is better to have 2 MT4 and separate MetaQuotes and IC Markets' historical data.

ThinkMarkets

Step 1:

Set up an account with ThinkMarkets via their website: <https://www.thinkmarkets.com/en/open-forex-demo-account/>

Input your personal details and check Standard Account. Similarly, this works even if your mobile number is unintentionally wrong.

Step 2:

Once you click Start Now, you will instantly be given your account login details.

Here is what it should look like, you should also receive them in your email.

Download your MT4 platform.

Similarly, you can login to their demo account using MetaQuotes' MT4 but it's not recommended.
