

Stakeholders Analysis

Exercise

Study Case

We have a client who recently married and is living at his mother-in-law's house. He is thinking about building a house and moving there.

Instructions

- Using the template provided in excel format, follow the instructions described in the first tab of the file to create a stakeholders map for the case study.

Questions

1. Which stakeholders do you identify for this project? Or, the positioning of who we need to consider to define the scope or identify the requirements?
2. Fill the stakeholder matrix with the attributes of each identified stakeholder. Based on the attributes of each stakeholder, which strategy do you consider the most appropriate to involve each of them during the project?

Professor's Solution

- After finishing the exercise, download the teacher's solution and compare it with yours to get some insights.
