

Correspondence Course Information

I offer five different correspondence courses designed to support you in exploring healing and herbal medicine.

Each course consists of 26 projects (ABCs is 52) and ongoing support, including 3 hours of personal time with me, bi-weekly zoom meetings, recommended reading list, and special gifts. (You may access the first hour of your talk time after paying at least \$150.)

The projects are experiences, experiments, and assignments that you complete in any order, at your own pace, in your own time, as you wish. You are free to complete your course as your time and life allow; there is never any time pressure or any time limit on your course. You are a student for as long as you want to be. There is no requirement to send in lessons or to report to me, except as you desire.

When you register, you will immediately receive access to all projects. Within two weeks, you will receive your physical project booklet and your welcome gifts.

Each course includes a basket of gifts that you can unlock.

- | | |
|--|---------------------------|
