RV how-to - RV videos - RV DIY® - RV tips - RV products & more

Life can be hectic, plan some time to slow down, relax and enjoy what really matters. ~Mark J. Polk

Enjoy the RV Journey!

Welcome back,

February, for lots of RV owners means cold weather, snow & ice, and the RV sitting in storage. You are waiting for spring's arrival prior to thinking about the 2024 RV travel season. But now is a great time of the year to plan your upcoming RV trips and making reservations. It is

getting harder to make campground reservations so being proactive as opposed to reactive is the best plan. This will also let you plan your vacation time in advance so your place of work is well aware of when you will be away from work. So, don't let dismal weather conditions keep your mind off of RVing, have some fun planning the RV trips you want to take in 2024.

Have you ever considered e-bikes for transportation at the campground? Be sure and check out this month's feature article to learn all you need to know about e-bikes. And don't miss this month's feature video to learn some interesting information about the type of screws used in RVs and the types of screwdriver bits to keep on hand in the RV.

Enjoy the newsletter, and as always if you have family or friends who like RVs and the RV lifestyle please share with them too.

This Month's Feature Article E-BIKES & RV OWNERS – THE PERFECT MATCH

When I started researching e-bikes I noticed prices ranging from \$600 to more than \$5,000. It comes down to the old saying “you get what you pay for.” Inexpensive e-bikes use a less expensive electric motor, lithium battery, and parts like brakes, shift

mechanisms, and the frame itself.
