

INTRODUCTION TO REEL GARDENING PRODUCTS QUIZ ANSWERS

1) **True or False: The seeds are inside the paper.**

Answer: True

Explanation: Seeds are enclosed inside the paper tape. When you feel the Reel Gardening Seed Tape you can feel the seeds inside the paper.

2) **True or False: You need to take the paper out of the ground when the plants start to grow.**

Answer: False

Explanation: The paper tape is biodegradable. Once you have planted the seed tape and the plants have started to grow, the paper will slowly decompose, adding extra nutrients to the soil. Leave the paper in the soil.

3) **Which of these is not a benefit of Reel Gardening Seed Tape?**

Answer: Contains good quality seed imported from Europe

Explanation: Reel Gardening only buys seeds from South Africa's leading seed suppliers.

4) **True or False: You should always plant out the entire area you have available for a garden in September.**

Answer: False

Explanation: You should always take the entire area you have available for planting and divide it into quarters. You should then plant out one quadrant a month for 4 consecutive months. This 'staggered planting' approach will ensure you are able to harvest from the garden continuously. It doesn't matter which month you start your garden in, as long as it is warm enough in your province. Some of the cooler parts of the country can start in September, but warmer regions can plant all through the winter months as well.

5) **True or False: Reel Gardening products work best for people who have experience growing their own food gardens.**

Answer: False

Explanation: Reel Gardening Seed Tape makes growing your own food simple, fun and quick, for everyone. You don't need to be an expert gardener to grow your own food with Reel Gardening.

6) **True or False: If you really want to make a big positive impact you need to plant a large vegetable garden.**

Answer: False

Explanation: Large gardens are necessary if your intention is to produce a lot of food. However, while a large garden may be necessary to feed a lot of people, it isn't necessary to teach a lot of people how to grow their own food. Small educational gardens can have a very big positive impact if utilised correctly.

7) **True or False: Each 50m² Garden in a Box and every Grow Pod and Learn and Grow Kit is packed according to province and month of planting.**

Answer: True

Explanation: The sachet gardens, 1m² and 2m² Gardens in a Box contain standard vegetable and herb mixes that don't change. However, the 50m² Garden in a Box, the Grow Pods and the Learn and Grow Kits are all packed to contain only the seeds that you can plant in a specific province in a specific month.

8) **True or False: 5m² of land is needed to grow enough food to feed one person a portion of vegetables everyday, sustainably.**

Answer: True

Explanation: 1m² of land will produce enough food to feed one person some vegetables every day for a month. However, you will need to plant 1m² of land every month for 4 months in order to feed one person some vegetables every day on an ongoing basis. By planting in this way, each of the 4 x 1m² areas you've planted will be growing at a different rate. Every month, a new m² will now be ready to harvest and eat from. However, you need to account for some crop failure. Some of your seeds might not grow, or you may experience a problem with pests or frost and lose some of your plants. To account for this failure, we estimate that you will need an extra 1m² of land. Therefore, you will need 5m² of land to grow enough food to feed one person some vegetables every day, sustainably.

9) **What does the Learn and Grow Kit NOT include?**

Answer: Soil and Compost

Explanation: You will need to produce your own ground soil and/or potting soil, and/or compost to fill the Grow Bag inside your Learn and Grow Kit.

10) **True or False: The Planting Revolution is an app that will teach you how to look after your Reel garden and sends you notifications to remind you to water.**

Answer: True

Explanation: The Planting Revolution Mobile Application is free in the Play Store, the App Store or in html 5 format on any internet enabled device. It was created by Reel Gardening to teach you everything you need to know to successfully care for your garden through a series of short, animated videos. It will also send you notifications every day to remind you to water and care for your garden.
