# Data Science in Action using Python

### An AAII Artificial Intelligence– Technical Track Course

Setup Sandbox

Focus of this section

1. Describe Use Case
2. Set up Sandbox
3. Review Data Science Methodology
4. Review Data Sources
5. Prepare Data Sets
6. Conduct Data Modeling
7. Evaluate Model Results
8. Deploy Model
9. Monitor Model
10. Summary and Next Steps

Overview

Sandbox Options

- Anaconda on your
  desktop/laptop

- Google Colabs

Python Basics
