 Most experts consider electric cars to be the future of the motor industry: they are clean, quiet, and can be recharged at home. On the other hand, a lot of people say that the battery life will be too short, recharging will take a long time, and the cars will be slow. One thing is for sure: we need to find another way to power our cars, because petrol is producing too much pollution.

3. Listen to the MP3 (5c) and circle which word you hear.

- a)     note                not
- b)     bloated              blotted
- c)     Joan                  John
- d)     woes                  was
- e)     toad                  Todd

4. Record yourself saying the words in sections 1 and 3, and the passage in section 2. Listen to your recording again in a few days. Can you clearly hear the two target sounds you studied?
