## Secrets of Terrific Type

### Lesson 04-07: Layer Style Quiz

After watching the lesson on Layer Styles, which image shows the MOST correct way to use (or not use) Layer Styles? You have three choices for all three questions.

#### Image A

Image B

Image C

**Answer: C is correct answer.** In this example, no layer style should be used. This font appears as if I took a pen and wrote on the paper so there would be no embossing or a drop shadow in real life. That is why C is the correct answer.

## Part 2

Which image shows the MOST correct way to use (or not use) Layer Styles?

### Image A

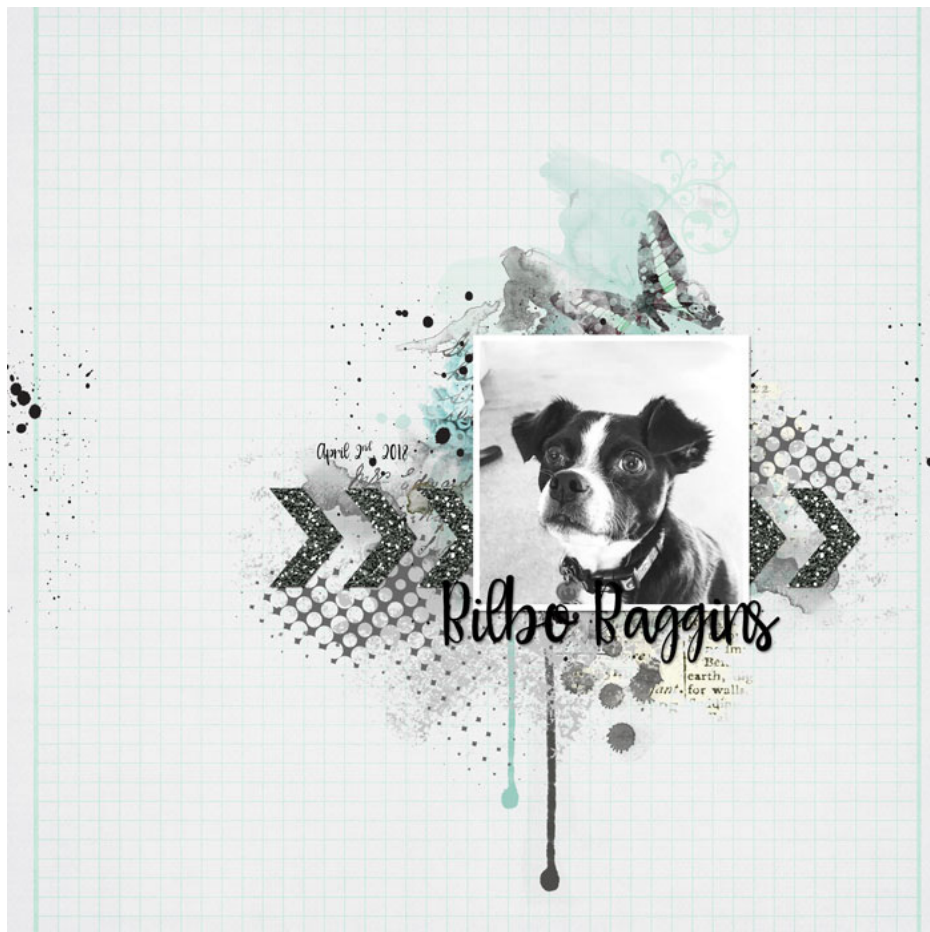

Image B

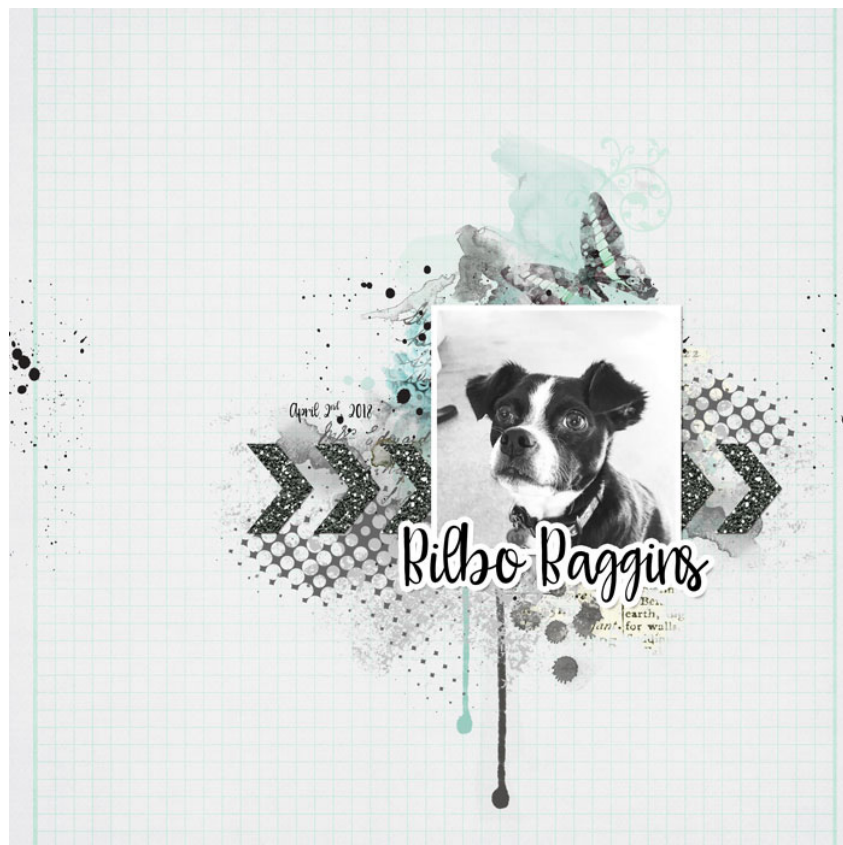

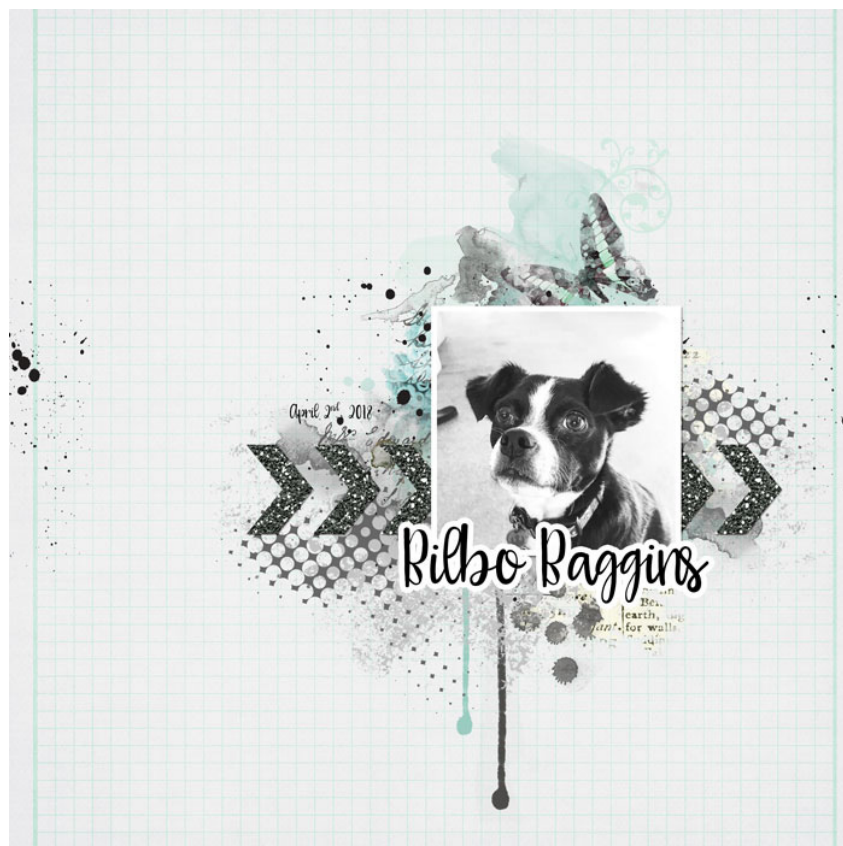

Image C

**Answer: B is the correct answer.** In this example, A is wrong because type doesn't normally have a drop shadow. C is wrong because the sticker has no drop shadow. B is correct because the sticker needs a small drop shadow in order for it to be correct.

### Part 3

Which image shows the MOST correct way to use (or not use) Layer Styles?

#### Image A

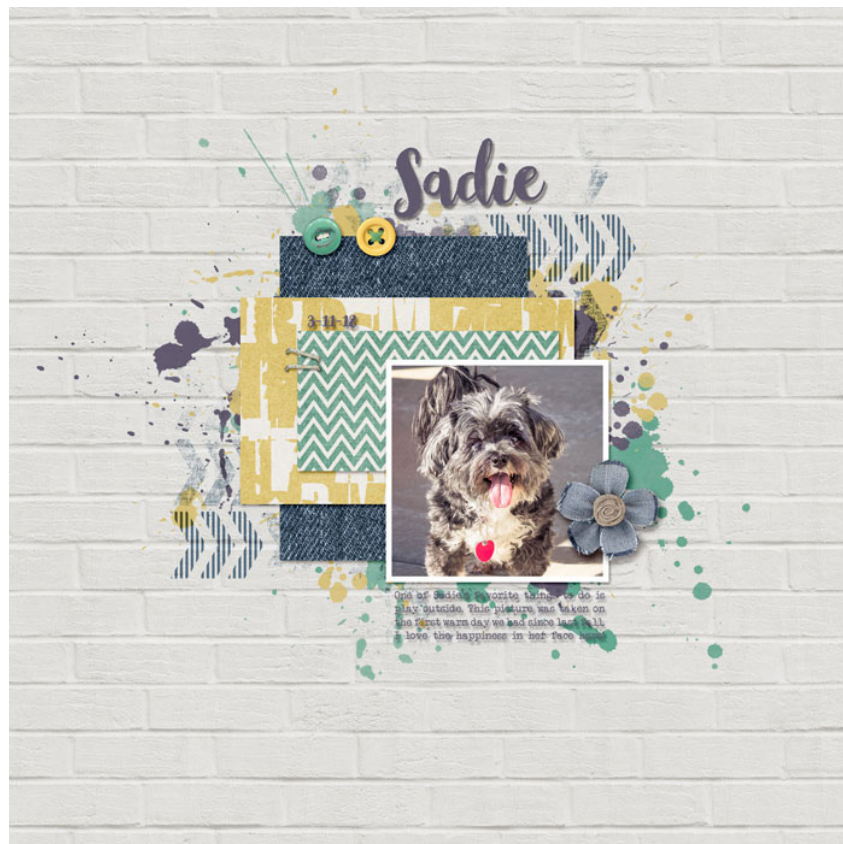

Image B

Image C

**Answer: A is the correct answer.** In this example, B is wrong because type shouldn't be embossed unless you're created a 3-d type alpha letter. C is wrong because again, type should never have a drop shadow (unless you're making it into a sticker).
