# STRATEGIES AND TIPS

## Amber's Tips

### Read the questions carefully

- Look for qualifier phrases such as “least expensive,” or “with the least amount of effort”
- There may be more than one correct answer

You can usually eliminate two answers right away because they don't make sense (“the distractors”)

### Correct answers:

- Are usually simple
- Usually involve an AWS managed service

## Amber's Tips

Make your first pass through all questions, answering things you're sure of

- Flag the others to come back to
- Make a second pass on all questions if you have time
- Sometimes a question later in the exam will help you remember an earlier answer

Never leave a question unanswered

- It will automatically be marked wrong
- Guessing at least gives you a chance

Take the official practice questions and exam

Registering for the Exam, Cost and Vouchers

# What to Expect

## ONLINE

Check in 30 minutes prior to exam

Required to run a system test (for video and audio)

Required to show ID

Required to show the proctor pictures/video of your surroundings

Wired Internet connection recommended (you might not be able to resume if disconnected)

Digital scratchpad provided in software

Will be monitored via your web cam

## AT A TESTING CENTER

Arrive early

Required to show ID

Place personal belongings in a locker

Scratchpad and marker provided (have to give back at the end)

Will be monitored during the exam

## After the Exam

You'll see whether you passed or failed (hopefully passed!) 😊

- Answers/explanations to questions not provided

Within a few days, you should receive:

- Exam results with a breakdown by domain
- A digital “badge” to proudly display, showing you're certified

## What's Next?

Let me know how I did!

- Leave me a review

Let me know how YOU did!

- In your review, let me know how you did on the exam, and any tips that really worked well for you

# Continue Your AWS Certification Journey

## Available AWS Certifications

Select a certification badge below to learn more.

### Professional

Two years of comprehensive experience designing, operating, and troubleshooting solutions using the AWS Cloud

The Professional level section contains five certification badges arranged in three columns. The first column has two badges: Solutions Architect Professional (top) and Solutions Architect Associate (bottom). The second column has one badge: SysOps Administrator Associate. The third column has one badge: Developer Associate. The badges are green for Professional and blue for Associate.

### Associate

One year of experience solving problems and implementing solutions using the AWS Cloud

The Associate level section contains one certification badge: Cloud Practitioner. The badge is blue and is highlighted with an orange border.

### Foundational

Six months of fundamental AWS Cloud and industry knowledge

### Specialty

Technical AWS Cloud experience in the Specialty domain as specified in the exam guide

The Specialty level section contains five certification badges arranged in three columns. The first column has two badges: Advanced Networking Specialty (top) and Database Specialty (bottom). The second column has two badges: Data Analytics Specialty (top) and Machine Learning Specialty (bottom). The third column has one badge: Security Specialty. All badges are purple.

THANK  
YOU!
