
WELCOME TO OUR ONLINE LASH LIFT TRAINING!

We have split the training into short bite-size modules so that it's easier to follow. You have two options to see it:

1. You can watch the whole training at once, one module after another, by enabling the auto-play option. We recommend selecting this option when watching the videos for the first time.
2. Watch any specific module separately.

Videos include a lot of detailed information, so we recommend focusing while you watch them to absorb as much information as possible.

Included with the course is a thorough ~40-page downloadable manual. We recommend downloading it and printing it out. The manual features several high-quality pictures, so we recommend printing the whole manual in color if you can access a printing shop. The manual is available in one long PDF with the introductory module and separated into specific topics in the corresponding modules. You can read the manual like a book from cover to cover or in steps as you progress in the course.

You will find a quiz at the end of each module. Taking the quiz to move on to the following module is not required, but we highly recommend it to determine whether you have absorbed the information provided in the course. If you don't pass the quiz, we recommend re-watching the module and re-reading the corresponding PDF.

Access to this course is individual and protected by copyright. Sharing any of the contents with others is prohibited, and doing so will result in termination of access and blocking from purchasing further courses from Ruthie Belle.

After signing up, you have access to the course for three months. If you want to extend access past that point, you can sign up for an extension of \$9.95/mo or 10€/mo.
