

## Recap: Demo Dog 2 Rhia Video 4

- Dogs will work at the pace that they're comfortable with, so don't rush them!
- If you find yourself with excess oil on your hands, wipe it onto a piece of kitchen paper, or a rag so that you're not wasting the oil. They might come back to it later.
- Offer essential oil for inflammatory pain before offering macerated oils for inflammatory pain to avoid your dog ingesting too much fatty oil.
- St. John's Wort can interfere with prescribed medication, so consult with a healthcare professional before offering this.
- Take time between topical applications & don't just splat lots on in one go as this may make them ill. A few drops at a time is plenty!
