

## Depossession Protocols

At this point in your training, you know how to activate your light body and you know how to dowse and measure the level of negative entities. You do not need to spend time on old-fashioned shamanic depossession techniques when you have more efficient tools. I will give you suggestions that are safe and helpful when it comes to entities.

Raymon Grace's dowsing technique for removing entities and assisting them to get proper treatment on the other side is the best I have found. Check out his book:

[https://www.raymongrace.us/store/p3/Techniques\\_That\\_Work\\_For\\_Me.html#/](https://www.raymongrace.us/store/p3/Techniques_That_Work_For_Me.html#/)

If you ALWAYS run your light body and perform your Hara Line exercise before healing sessions, you have nothing to worry about when it comes to negative entities and demonic possession. This is why spiritual hygiene practices are so important.

If you are working with someone who is currently being treated for addiction issues, schizophrenia, multiple personality disorder and/or bipolar disorder, there is always a possibility of encountering entities and attachments. Individuals who have suffered severe trauma in the past are at risk for entity possession, as well.

### Precautions

1. DO NOT gaze into the eyes of someone you believe may be suffering from possession, you do not want to give the entity attention, they feed on fear.
2. Make sure you have activated your Light Body and Hara Line.
3. Set up a column of light to fill up the entire room. Use your intention.
4. Pray for protection for you, your client, your animals, invoke and decree Archangels, Spirit Guides by name to make a circle of protection around you. Ask for the highest, most powerful angels of the light to be with you.
5. When you do these preparations, you are no longer in charge of the session, you are only the facilitator and this will keep you well. If you try to use your will to do a depossession, you will fail. Negative entities can take your energy and use it against you. If you stay in the power and light and love of Christ, nothing can stop you from helping this person because your guides are doing the work.
6. Send your Nu'a cone deep into the earth, asking for a fine, high smooth vibration.
7. Put your Diania plane down in the front so as to not take on energy.
8. Amp up the Leow as the high frequencies are modulated.
9. Stay in LOVE instead of will. Negative entities are powerless to love.
10. Never channel from your 6th chakra, give readings from your 7th chakra to stay healthy. \*Avoid alcohol which lowers your frequency, psychedelics open your energy field. Stay clear so you can be strong. The following is Raymon's protocol:

## Ghost Bustin'

### **PROBLEM:**

Negative entities can cause people to be grouchy, dishonest, sick, alcoholic, drug users, abusive to their family, suicidal, and a lot of other undesirable characteristics.

### **TECHNIQUE FOR SOLUTION:**

Determine if the person is possessed and by how many entities. Also, determine if there are negative entities within the person's energy field that are causing problems.

"Exorcism" by my friend the late Eugene Maurey is an excellent book on how to do this, and this book contains a chart of how to measure the strength of the entities. His chart measures the strength of entities from 0, which is balanced, to -30 which is a serial killer.

I found something that I never got to discuss with Eugene before he passed over. Most people possessed with an entity of -10 have a tendency of drug usage, a -15 is likely to be an alcoholic and a -20 will have suicidal tendencies.

\* Ask your Spirit Guides to take the negative entities possessing the person and all those within their energy field over to the other side, where they will be given the appropriate treatment by those on the other side. Then ask that they be sent on to the realm of the Spirit world where they need to go.

Once this is done, ask for a shield of protection to be placed around the person so that no negative entities can come within their energy field. This will be effective in most cases. However, in some cases I have found it necessary to de-possess a person again in a few days. When this happens, ask if the person has a desire to be possessed and how strong is the desire. This can be measured in the form of percentage on the chart by Walt Woods.

Some people like the power that being possessed gives them and after being cleared, they will just attract more negative entities. The only thing I have found to do for these people is to lower their desire of being possessed. It doesn't always work because we cannot override a person's free will.

Always thank your Spirit guides for their help.

### **RESULT:**

Results of this method have been nothing less than miraculous. The behavior of people has changed in a matter of hours. Examples have been giving up alcohol, being less abusive to their family, having a more pleasant personality and becoming less violent.

Gemstones such as Obsidian, Smoky Quartz and Black Tourmaline are used in traditional shamanic de possession ceremonies but I am not suggesting those protocols to you when we have advanced methods available to us now. Gemstones are always a wonderful enhancement to a session with a well person, but do not rely on dark stones to clear an entity or demon. You need higher dimensional forces at work.

In Energy Chelation treatments, it is best to begin at the feet and clear your way up through the body. This is a safe rule of thumb in case there is an entity and you are not aware of it. If you are ever in doubt, step away from the table as far out of the person's energy field as you can, drain your hands to the earth and then dowse and ask if there is a negative entity attached to this client.

If you wish to enhance your Chelation treatment with gemstones, it will only add to the session to use obsidian or black tourmaline as you work your way up the chakra system, from the root to the crown. You can place dark stones on the areas you have already cleared as you work with the energy up and out through the crown.

Chelation will remove the entity, but if the client's circumstances do not change as to why they were subject to invasion, the entity may return at a later time when the vibration is not so high for the client.

**Let's stop and think for a moment why dark stones have been used for centuries to protect against dark energy. You are using the molten lava core of Mother Earth for protection! It makes sense that the life blood of Gaia works to protect us from lower vibrations and frequencies. If you are in a hostile work environment or less harmonious spaces, carrying obsidian, black tourmaline or onyx in your pocket or as adornment can be supportive and helpful.**

\*If you are working with someone who has given or received an organ transplant and/or blood donation, Shamanic Spirit Retrieval Work helps you gather the bits and pieces that have been scattered around and focuses the person's energy back home, to their own energy field. We cover Spirit Retrieval in the Expanding Sacred Shamanic Living course.
