

In this week's course, the student will understand that the next number in a sequence is one more when counting by 10's, the next number in the sequence is ten more & the importance of counting on from any number which will build their fluency for addition.

This week will be **FUN**, *engaging*, and *exciting*. We will learn and become great mathematicians together. We will work hard and do our very best & remember it's NOT magic, it's math!

## **What you'll be learning to do during week 1:**

- Count forward to 100 by 1's
- Count forward to 100 by 10's
- Count forward from any number
