Driverless Buses in Swansea?

SWANSEA (12 May)—A consortium of city government officials and local business leaders is considering the purchase of driverless buses for some city routes. Commissioned with exploring options to improve transportation in Swansea and surrounding areas, the group recently sent three members to Malaga, Spain, where driverless buses run an eight-kilometre loop several times a day.

Consortium member Gareth Elias was impressed by what he learned. Despite concerns about safety and traffic regulations, Mr. Elias could see driverless buses becoming a reality before long, but only in specific cases. "I believe they would be particularly useful during festivals and special events," he said. "I can't imagine them being on the roads every day."

Anisha Deepak, an engineer specialising in transportation innovation, served as a technical consultant on the trip. She was struck by the complexity of the buses' artificial intelligence system, which allows them to learn as they collect data on every trip.

"Artificial intelligence makes these buses very safe in real-world situations," she said. "Nevertheless, it's best to have a human operator on board at all times in case of emergencies."

A public community forum is scheduled for 2 June to discuss the benefits and drawbacks of driverless buses. Visit the Swansea Town Council's Web site at www.swanseatowncouncil.gov.uk to learn more.

- (C) She took notes during an emergency meeting.

Questions 172-175 refer to the following article.

Research Findings Presented

GALWAY (1 July)—Eva Urban and her research team at the Ireland Agronomy Association presented their findings to the Galway Department of Transportation on Thursday. During their three-year study, the team was tasked with researching ways to improve the success of tree and shrub plantings along roadways. — [1] —.

“The ground next to newly paved roads is often compacted by heavy machinery associated with construction,” Ms. Urban said. “As a result, the soil can’t absorb water or nutrients well, which makes it difficult for new growth to establish itself. — [2] —. My team set up different experimental plots alongside highways and tried various combinations of planting, tilling, and amending soils to determine what worked.”

The final results of the government-sponsored research project were compiled into a 50-page handbook. Although the

handbook was written specifically for the Galway Department of Transportation, its recommendations can be applied by municipal agencies throughout the country. — [3] —.

“Each chapter explores one of the ten best practices identified by the team,” said Ms. Urban. “These basic techniques are relevant regardless of where they are implemented. The only site-specific variable is plant selection, as that will depend upon the particular geographic region.”

Another point conveyed by the study is that successful plant establishment requires an integrated approach. — [4] —. Improving roadside planting requires a thorough assessment of a site’s existing conditions as well as a wide variety of management practices to address the specific issues involved.

- (A) It is only ten pages long.
 - (B) It will be distributed to the public.
 - (C) It was the subject of a local dispute.
 - (D) It is appropriate for use in other parts of the country.

175. In which of the positions marked [1], [2], [3], and [4] does the following sentence best belong?

"In other words, one action is not enough."

Dear Ms. Granger,

Our retail stores have been accepting your CGS-P27 High-Speed Gaming Computers for repairs as arranged. As you may know, owners of your gaming system are reluctant to give up their devices for repair once they find that they will be without the system for two to three weeks. Today alone, three customers (PCI-70734, PCI-17503, and PCI-90022) declined to have their systems repaired.

The good news is that users of your gaming system are very loyal. However, to increase compliance with the recall and as a public relations gesture, you could provide us with several devices as part of a loaner program. Let me know how I can assist with this arrangement.

Greetings!

My submission, "Ji's Journey," centers on a young dress designer, Toby Ji, who overcomes obstacles to realize her dreams in the fashion industry.

I was introduced to *Undeniable* last year by my writing instructor at the Artman Institute in Portland, Oregon, and have since become a subscriber. I particularly enjoy your Nonfiction Corner; one of my favorites was "Waygone Beach," which inspired me to write "Ji's Journey." I believe it would be an ideal fit for this section. Like "Waygone Beach," "Ji's Journey" is a true story of hope and perseverance.

Thank you for your consideration and for creating a forum for new writers like me.

Sincerely,

Len Sutherland

Dear Mr. Sutherland,

Your story, "Ji's Journey," generated a great deal of positive feedback about the June issue. Congratulations! And your instincts were correct regarding your story's placement. All this has us hoping you will submit more stories to *Undeniable*. As an added incentive, we will be increasing our honorarium to \$100 beginning next month.

As a subscriber, you are likely familiar with Stacy Jordan's question-and-answer column featuring a different writer each month. Would you be willing to answer a few questions about your literary training, writing method, and how you find story ideas? If so, I will forward your e-mail address to Ms. Jordan, who will reach out to you in the near future.

Sincerely,

Jerry Buckman
Associate Editor
