

MINDFUL (MOSTLY)

# NEW MOON KIT

# My life changed and yours will too ...

In 2015 I found myself alone, in a new city beginning yet again. I had just uprooted my life, my relationship had ended, and my support system lived miles and miles away. At that time, I began to look deeper into myself and the Universe for the direction I so needed in my life.

**That's when the answers came and my New Moon Supertools were created.**

Since ritualizing and coming to cherish each New Moon, my life has flourished in ways I never imagined possible. I met the man of my dreams, I have an incredible, fulfilling career and a beautiful network of cherished friends. All of this, I manifested with these New Moon Supertools and you can too.

New moon rituals are an ancient and sacred practice which have been abandoned in our modern lives. Yet even in today's screen filled, social media driven world, their power and significance is stronger than ever.

In the following **Mindful (mostly) New Moon Kit** You will learn how to incorporate this incredible practice into you life. It is best done on the New Moon, as vibrations are high, but can be used as a manifesting technique whenever the spirit calls.

**So if you're ready...**

I invite you to get quiet and plant the seeds of intention into you life for the weeks and months ahead.

Don't be surprised at how fast the universe moves once you've decided.

*-Andrea*
