

"This 'n That" Bracelet – Materials List

This is a very personal piece because **you** will be selecting the types of cabochons to create your one-of-a-kind bracelet. I offer suggestions as to the types and sizes of cabochons to use in the section on **Cabochons** below.

The amounts and types of beads needed for the bezels and connectors are shown in the **General Materials List**, but there are **not** specific colorways because you will need to determine your own colors depending on the cabs you select. If you need some help in choosing colors, there is a video in the course curriculum - "Selecting Bead Colors" - where I walk through selecting each of the bead colors.

For your reference, I list the bead numbers used in the written instructions and videos on Page 2 of this handout.

General Materials list:

Beads:

- 11/0 Delicas: 5-6 colors; about 2-3 grams of each color
- 15/0 Seed Beads: 1-2 grams (used on bezel and connectors)
- SuperDuos: 21-30 beads (depends on the size of your bracelet, 3 beads are used in each connector between components and clasps)

Clasps:

- 16mm Slide Bar Tube Clasp
OR
- Cymbal Kypri SuperDuo Magnetic Clasp

Needles and Thread:

- 6# Fireline or your thread of choice
- Size 12 Beading Needle
- Size 11 Straw Needle (optional – to use when attaching the magnetic clasp)

Cabochons: 6-8 cabochons ranging in size from 14mm to 20mm (depends on the size of your bracelet).

I like to think of this bracelet as a way to showcase your favorite cabochons! They can be Lampwork Beads, Semi-precious Stones, Czech Beads, Rivolis, etc., but keep a “round” shape.

My special Lampwork Cabochons came from Donna Mehnert of Blackberry Beads, and were the inspiration to design this bracelet! Donna has made several of these bracelets and is offering cabochons in the suggested sizes in her Etsy shop. You can find them at [Donna Mehnert by blackberrybeads on Etsy](#)

“This ‘n That” Bracelet – Materials List

FYI... Bead numbers/colors for beads used in the written instructions and videos

Shown here as a reference because I'm often asked about the numbers/colors I've used. Yours will depend on the colors of the cabochons you select. 😊

Note! I've shown numbers for 15/0 seed beads assigned at my local bead store – they **may not** be the same as numbering used by Miyuki. However, I think many bead shops in the USA get their beads from the same distributor, so the numbers could be the same depending on where you purchase your beads. If I know they are Miyuki, I state that.

Written Instructions:

Delicas:

- (A) DB651- Opaque Squash
- (B) DB785 – Matte Transparent Purple
- (C) DB1782 – Turquoise/White ICL
- (D) DB434 – Galvanized Muscat
- (E) DB169 – Chartreuse AB

Link Beads: DB2302 – Matte Opaque Glazed Citron AB

15/0 Seed Beads:

Bezel → #431A Opaque Luster Light Green

Connectors → #4205 (Miyuki) - Duracoat Galvanized Zest

SuperDuos: Opaque Green Picasso

Videos:
