

1

The Skill Set & Mechanics

- Learn how to maintain a consistent high standard of behaviors.
- Learn how to use several teaching strategies to generalize and strengthen a behavior while creating a versatile learner.
- Learn how to break a behavior down by micro-slicing.
- Understand and master compound linear behavior chains.
- Learn how to improve a behavior chain by practising "fast cueing".
- Learn how to teach a solid retrieve

The Behavior

- Compound Chain: Fetch Me a Drink! (Open door, Collect, Hold, Fetch, Release to hand, Close door, Return to handler)

2

The Science & Knowledge

- Understand the complexities of behavior chains.
- Understand forwards and backwards chaining
- Understand why and when you should introduce a buffer behavior into a linear chain.
- Understand how and when to fade individual cues from a behavior chain.
- Have a clear understanding of operant conditioning
