

Functions Exercise 2 Solution

```
1. input_1 = 10 ## Don't modify this
2. input_2 = 40 ## Don't modify this.
3.
4. ## TODO:
5. ## Implement a function called sum_fun that takes two inputs and returns their
   sum.
6.
7. def sum_fun(input_1 , input_2 ):
8.     return input_1 + input_2
9.
10. result_sum = sum_fun(input_1 , input_2 )
11.
```
