

Handout For: Lesson 8

Summer vacation is a great time to take a road trip! The Turner family is traveling a total of 2,678 miles! If they travel 1,808 miles while driving and fly the rest of the miles, how many miles will the family fly?

Extra Practice

The Turner family stopped along the way while driving 1,808 miles. They had traveled 998 before they visited New Mexico. How many miles did they have left to travel after stopping in New Mexico?

Plane tickets cost \$1,650 for the trip. The family of four received a \$75 discount for each family member. How much did they end up paying for flights for the trip?
