

Episode Title: Configure and manage Defender for Servers

Objectives:

At the end of this episode, I will be able to:

1. Compare Defender for Servers Plan 1 and Plan 2
2. Onboard servers using scripts
3. Verify installation status

Key Points:

Key Point 1

There are two licensing plans available with Defender for Servers: Plan 1 and Plan 2. Be aware of the feature difference between the two and understand which features are available in each plan.

Key Point 2

Server onboarding can be performed in a variety of ways - scripts, local installations, Group Policy, and more. Be aware of and practice the different methods of deploying the agent to servers.

Key Point 3

After onboarding, there are registry values that can be customized for your environment. Locate these values and understand how to modify them to meet your organization's needs.

- If additional resources are used during the episode, they can be obtained using the download link on the overview episode (e.g. diagrams, no powerpoints)

External Resources:

If external resources were used during this episode, you can reference the following external resources for supplementary tools and information, if none were used, then this section will be blank:

- Protect your servers with Defender for Servers
