

# How to hold the pick

Step Nr.1 Make a circle so that the front of your pointer finger is touching the middle bottom side of your thumb.

Step Nr.2 Gently slide the pick in-between the two fingers, so that only the point of the pick is sticking out.

Step Nr.3 Try to make contact with the tip of the string, NOT pushing it in too deep!

Step Nr.4 Tilt the pick slightly forward so that it can cut through the spring with as little resistance as possible!
