By the end of this program, you will know...

1 About Curriculum Design

including what your fears are when it comes to designing curriculum for your music classroom, how to move beyond them, why curriculum design works, and how to choose an instructional model

2 How to Backwards and Long Range Plan

including what backwards planning is, and how to create your own curriculum map and scope and sequence

3 Ways to Organize Your Teaching Content

including steps to finding resources, creating a songs and activities list by objectives, and different folders and organizational systems

4 Ways to Plan for Different Grade Levels

including lower and upper elementary ideas, sequencing instruction each year, and structuring class time

5 Assessment Ideas that Work

including knowing how to read the language of the objectives, collecting and analyzing data, informal and formal assessment ideas, and new ideas to implement
