Kotlin Advanced

Rare Kotlin skills for senior developers

- type system mastery
- writing generic tools and libraries
- designing custom DSLs
- deep understanding of Kotlin internals
- writing code analyzers and generators

Hands-on

- 50+ examples and exercises
- 1800+ lines of code from scratch

Platform agnostic

- JVM
- Android
- multiplatform

Best for established Kotlin developers who

- have increasing impact in complex environments
- need to write tools & generic code for other developers

Purpose agnostic

- desktop applications
- mobile applications
- server-side

Tips

Take the course in order

Write the code (and exercises!) yourself

Come with high focus & energy

Sit for 1-2h per session

Have fun!

Kotlin rocks
