

COURSE GUIDE

There is a lot of information to take in on this course, so I have tried to make it as easy as possible for you by providing worksheets, text and audio versions of the lectures. While it will be tempting to go and research opportunities right away, I strongly advise you finish the course first and get a clear idea of which path you want to follow before starting. It will save you a lot of time!

DOWNLOADS

Throughout the course you will find a number of resources you can download in each section including:

- PDF - Text version of the lecture
- MP3 - Audio version of the lecture
- PNG - Wallpaper for your computer or images you can print out
- XLS - Spreadsheet

Many of the lectures also have worksheets for you to download so you can reinforce what you have learnt and build up the knowledge you need to start working from home.

Print out the PDFs and worksheets and keep them in a binder so you can refer to them quickly at any time.

If you feel there is anything missing from the course or you would like us to suggest a resource for you, let me know!
