

# WHAT IS REAL ESTATE WHOLESALING?

Real Estate Wholesaling is the easiest way to get started in real estate investing/flipping with little to **NONE** of your own money.

Wholesaling real estate is like wholesaling anything else. We purchase a house from an owner, and then sell the house to an end buyer/investor for more than we bought the house for.

In this case, when we purchase the house from the owner, we are going under contract and not closing on the property with our own money, as we **ASSIGN** that purchase contract over to the end buyer who will pay for it.
