

POTTY TRAINING SCHEDULE

AFTER BREAKFAST

Once they finish breakfast, if you can't watch them, put them back in the crate for about 20 minutes. Take them straight out to the potty area and tell them "Go Potty". They should pee and poop quickly. Once done, leash them up and tell them "Let's Go" to head inside.

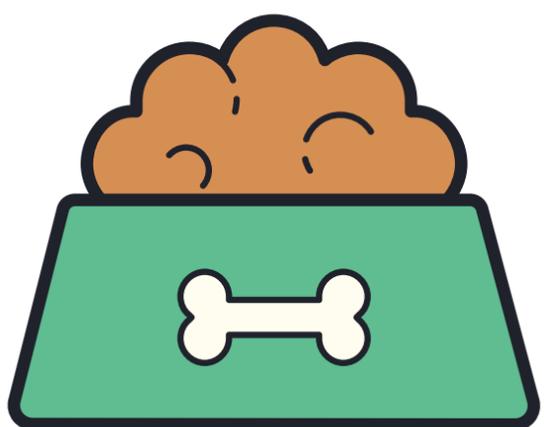

AFTER DINNER

Once they finish dinner, if you can't watch them, put them back in the crate for about 20 minutes. Take them straight out to the potty area and tell them "Go Potty". They should pee and poop quickly. Once done, leash them up and tell them "Let's Go" to head inside.

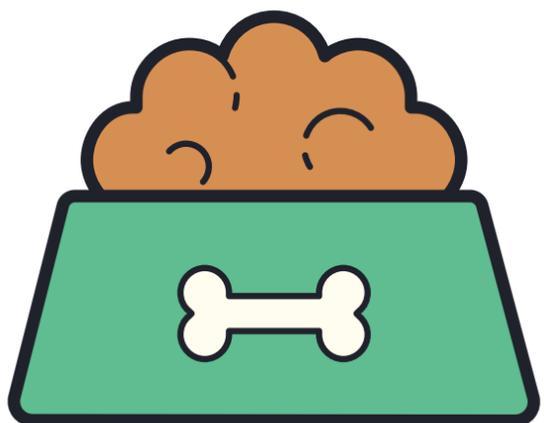

MORNING/WAKE UP

Dog is taken out to potty area and told "Go Potty". They should pee right away, poop may take a little bit longer. Once done potty, leash them up and tell them "Let's Go" to head back inside.

THROUGHOUT THE DAY

Figure on taking them out to potty every 3-6 hours throughout the day, depending on your schedule. If they eat or drink anything, make sure that you take them out 20-30 minutes after so they can potty. DO NOT give them free roam, they must be leashed up with you or crated/outside when they're not supervised.

BEDTIME

Dog is taken out to potty area and told "Go Potty". They should pee right away, poop may take a little bit longer. Once done potty, leash them up and tell them "Let's Go" to head back inside. ****If you know they need to pee or poop, but didn't when you took them out, they go straight back to the crate for another 15-20 minutes then get taken out again. They MUST go potty outside in order to earn the time with you inside.****
