

Lesson 2.3 - Writing Linear Equations in Point-Slope Form

Linear Equation Point Slope	$y - y_1 = m(x - x_1)$
--------------------------------	------------------------

1. What is an equation of the line that passes through (2, 8) and has a slope of 2?
2. What is an equation of the line that passes through (-3, 9) and has a slope of -1
3. What is an equation of the line that passes through the points (-4, 8) and (4, 2)?
