PUA Encoded Fonts List

On the <https://fontbundles.net> website, any font with a blue checkmark next to the name means that it is PUA Encoded.

Here is a list of some of their free fronts that are PUA Encoded:

1. Canvas Script: <https://fontbundles.net/canvas-font>

The Hungry Jpeg makes it more difficult to tell if a font is PUA Encoded. You'll have to read each description to see if it's mentioned.

The Creative Market lets you search for PUA Encoded Fonts by typing "PUA Encoded Fonts" in the search box. Always double check the description but the search seems to work well.
