## B Pick Four Words

I like to put random words together sometimes and see what happens. Use the Pick Four Words list on the next page. Each column has 26 words. Choose four different numbers from 1 to 26 or have someone else pick the numbers for you—without looking at the lists. Say your numbers are 7, 11, 23, and 5. Now write down the 7<sup>th</sup> word in the first column, the 11<sup>th</sup> word in the second column, the 23<sup>rd</sup> word in the third column and the 5<sup>th</sup> word in the fourth column. Think about the story you can invent using the words: *blizzard*, *fall*, *scroll*, and *lie*.

Use the spaces below to brainstorm some story ideas from your four words.
