

# From Zero to Guitar Fingerpicking in 30 Days

A Udemy Course by Patrick O'Malley

[www.learnfingerpicking.com](http://www.learnfingerpicking.com)

## Section 1 – Lesson Three

### Some Beginner Resources

There are a few things that you need before you get started:

1. Have a guitar
2. Be able to string up your guitar
3. Be able to tune your guitar

The chances are that you already have a guitar if you are taking this course. But if you do not, (or if you are thinking of a little upgrade) then check out some of the options [here](#)

If you have an old guitar and you need to buy strings, then it's probably good to get a light set of strings or "11 gauge strings" for your acoustic. You need to be able to put strings on your guitar so if you can't do it yet, then bite the bullet and try.

The worst that can happen is that you make a total mess of it. You get confused or break a string. It's ok. It's the only way to learn how to change strings. When you go to buy strings, buy two or three packs so breaking a string isn't so bad.

This is a great [YouTube video](#) if you need guidance on how to put strings on your guitar

For tuning your guitar, there is a [good guide here](#) if you have never done it.
