## Gallery...

All beads are 11/0 Delicas, except for the embellishment. In the colorways, I list the color and name for all the Delicas. However, I only show the “type” of bead I used for embellishment – it will be up to you to pick an accent color that you like for your bead selection.

The quantity of Delica beads for each color is shown below. Most of us purchase our Delicas by the gram, so consider approximately 200 beads/gram. I’ve rounded up to be sure you have enough.

**A** = 788 beads (5g)   **B** = 328 beads (2g)   **C** = 652 beads (4g)   **D** = 454 beads (3g)

If you are selecting your own bead colors, my suggestion is to have a contrasting color between **A** and **B**, especially if you have never done MRAW. It will help you keep track of the number of “spacers” you are adding for the various triangles.

**C** is the color used in the body of the triangles and warped square bail. **D** will be alternated with **A** to create the borders - choose colors that blend, or with a strong contrast as shown in the Black & White Colorway.

View the **Video**: [Overview](#) for a closer look at all the colorways.
