

Overview: Types of Cancer

In this unit we're going to explain to you what the five main types of cancer are. What stage and grade mean and the processes or the systems that are used to categorize them. This is going to help you understand your pathology reports. If you get a diagnosis that has a stage or grade, what your doctor means by that. As always, if you have questions, put them in the chat below and a member of our team will get back to you.
