

Hundreds Chart Puzzle Preparation

This is for an adult to prepare

Slice one of the hundreds charts into vertical strips, and use the second (optional) hundreds chart as a guide to complete the puzzle.

Variation 1: If you decide to print two hundreds charts, perhaps print the one that you intend to slice up onto a coloured piece of paper

Variation 2: once sliced into strips, students can paste the completed hundreds puzzle chart onto a blank piece of paper OR on top of the corresponding numbers of the no coloured hundreds chart OR into a new page of an exercise book

Variation 3: laminate / contact for durability to make a reusable puzzle
