## ANGLES

### Definition

The space within two lines or three or more planes diverging from a common point, or within two planes diverging from a common line.

### Math Rap

Angles should not perplex  
Two points meet at the vertex  
The amount of turn between two lines  
Try some, make some, you'll be fine

### Inspection & Reflection

- Without angles, would life just be straight and boring?
- How many angles can you make out of a 12-inch piece of string?
- If your elbow is the vertex, what is the angle range of an arm in degrees?
- What's the biggest angle you can make between an index and middle finger?
- Try the 180, 90, 45 degree arm song/dance while shouting out the angles.
- Define an angle in your own words.
- What angle do clock hands make when it is 6 o'clock? Make more clock angles!
