

Handling Exceptions

Exceptions

Serious business: exceptions are not rejections

Bright side: easier to handle

Recap

Handle exceptions

- `ExceptionHandler`
- exception handling directive

```
val myHandler: ExceptionHandler = ExceptionHandler {  
  case e: RuntimeException => ...  
  case ie: IllegalArgumentException => ...  
}
```

```
handleExceptions(myHandler) {  
  // Route which can throw  
}
```

← exceptions are caught and handled

Exceptions are not aggregated

Default handler returns HTTP 500

Akka rocks
