## Design Beautiful Pages

### Lesson 04-01: Creative Team Inspiration

This fresh crop of Creative Team pages really catches the spirit of Compelling Cluster designs! Whether the cluster is straightforward and sparsely decorated, like this striking travel page by Donna...

...or a riotous mixture of rectangular and circular photos with lots of color and beautifully placed elements like this page by Penny, cluster pages are a great way to display your photos.

Joyce shows us that a cluster can be very soft and pretty, even artistic!

And speaking of artistic, this page by Deborah is almost a cluster page in disguise, and yet it has all the proper elements for a great cluster. Notice how Deborah used a photo as her background.

Paula does the same with her endearing pet page. Her photos are SO cute, and I love her understated title and cluster of elements in the lower left corner.

I really enjoyed seeing the way Creative Team members used patterned paper to good effect. Like this page by Vynette with the patterned paper behind her photos...

...and this page by Lori that snuck in three patterned paper pieces behind the photos. Also, notice Lori's tight design with proximity of elements, title and journaling snuggled up next to her photos!

I'll end with a couple of sweet pages that focus on clustered elements rather than the more traditional photo cluster design. This cute page is by Terri who used a stacked photo effect and a circular flow of elements.

And this page by Kathy also focuses on element clusters rather than photo clusters.
