Stampin' Up! Embossing Folders, Heat and Paste

Heat Embossing

First Step: Rub area to emboss

Choose Your Stamp

Apply Versamark to stamp & stamp

Sprinkle Embossing Powder

Pour over a sheet of white paper and then pour excess back into jar

Tap off excess

A small dry paint brush may be used to clean up tiny areas

Gently flick the back with your finger

Use Heat Gun

Stampin' Up! Heat Gun is set on #2

Let Heat Gun warm up before applying
to stamped area

And VOILA! Too cool right?

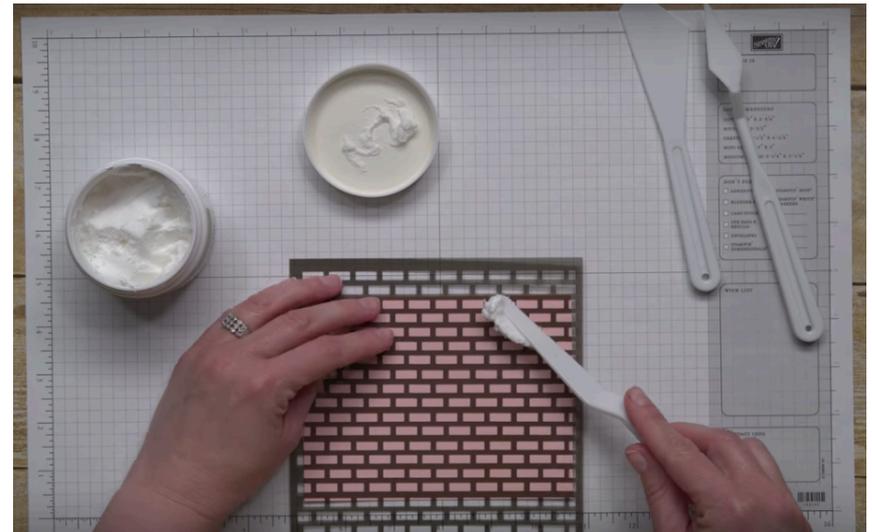

Embossing Paste

Gather your supplies

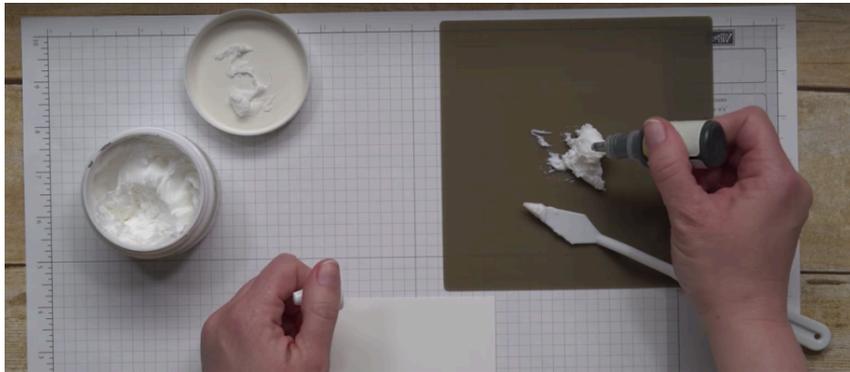

- Embossing Paste
- Palette Knives
- Decorative Masks
- Baby Wipes
- And my “must have” is a small plastic tub with warm soapy water to soak my masks in as soon as I use them
- Paper towels

It really is this easy!

Or add ink refill to color too!

Be sure to pop masks directly into soaking area as soon as you are done.

Embossing Folders

- Use your Big Shot and the basic platform and two clear plates

-except if you are using a Dynamic Textures Folder and then you will only need 1 clear plate

You will not need the “Thin Die Adapter”
