

Hello everyone and welcome to chapter 2 of the creative pentatonic video course. In this chapter you're going to learn two positions of the minor pentatonic scale. You can work on them separately and then together in your soloing and technical workout.

We have some picking exercises, some phrasing exercises, and some creativity exercises that you're going to work on. So check out the PDF it has the fingerings and all the examples written down.

We have the audio examples to listen to, the backing tracks to practice with, and of course, the video demos to check out to see how I play and demonstrate these ideas. So, check out all the material, have some fun with these pentatonic scales, and we'll see you soon.
