#### **Price/Yield Relationship**

#### -Denton, TX ISD Bond Example

### **Duration**

#### -Bond's sensitivity to changes in interest rates

Duration – Is the weighted average time to receive all cash flows from a bond – coupon payments and principal payment.

- It turns out that duration is a good measure of the sensitivity of a bond's price to changes in interest rates.
- If a bond has a duration of 5 years and interest rates decrease by 1%, the bond's price will increase by approximately 5%
- If a bond has a duration of 5 years and interest rates increase by 1%, the bond's price will decrease by approximately 5%.
- All other things being equal, the longer a bond's duration, the more the price will change for a given change in interest rates.

### **Duration/Cash Flow Example**

**Duration & Cash Flow Example** 

#### **Fixed Income Portfolio Management**

Construct a set of fixed income instruments or securities ("bond portfolio") that seeks to meet the investment objectives of a client – typically, a steady stream of income and capital preservation – within a set of risk constraints.

## **Organizational Climate**

### Management Style: "Star System"

### Management Style: "Traffic Cop"

## **High Net Worth**

- After tax income
- Diversification
- Capital Preservation

## **P&C Insurance Companies**

- Income, Diversification, Capital Preservation +
- Book Yield
- Asset/Liability Management
- Liquidity
- Regulatory/Tax Considerations

## Banks

- IDC + ALM
- Net Interest Margin
- Robust Regulation

## **Other Taxable Institutions**

- Nuclear Decommissioning Trusts
- Personal Injury Trusts

#### **Non-Taxable Investors**

- Opportunistic
- Capital Appreciation vs. Taxable Bonds

## **Client Objectives – Policy Statement**

**Client Guidelines:** 

- Investment Objectives
- Investment Universe
- Risk Tolerance

#### **Investment Vehicles**

- Mutual Funds
- ETFs
- Closed End Funds
- SMAs

## **Mutual Fund Characteristics**

- Actively managed
- Trade at close of business at NAV
- Daily liquidity

# **Types of Mutual Funds**

- Maturity/Duration
- Investment Grade
- High Yield
- Single State
- Money Market

## **ETFs**

- Track an index
- Trade on an exchange
- Price can vary from Net Asset Value

## Index Funds and Tracking Error

Tracking Error

- How closely the fund tracks its benchmark
- Expressed as the standard deviation of the difference in returns

Average Annual Tracking Error (2012-2021)\*

# **Closed-End Funds**

- Set \$\$ amount raised
- Trade on an exchange
- Price varies from NAV
- Leverage

### **Separately Managed Accounts**

- Active
- Laddered
- Hybrid

## **Active Management**

- Manager discretion
- Precise customization
- Institutional accounts

#### **Portfolio "Ladders"**

- Passive
- "Mass Customization"

#### **Considerations for Ladders**

- "Spacing"
- Quality
- Liquidity
- Callable bonds

# **Hybrid Portfolios**

- Ladder +
  - ETF
  - Crossover
  - Tax Loss Harvesting

#### **Active Portfolio Management**
# **Client Guidelines: Municipal Bond Portfolio**

- *Objective*: Generate tax exempt income while preserving capital, diversify overall client portfolio.
- *Performance objective*: Outperform the Barclay's 1-10 Year Muni Index on a rolling 3 year basis
- Investment Universe: Municipal bonds rated BBB- or higher by at least one NRSRO
- *Duration*: +/- 0.5 years vs. index.
- *Limits*: Holdings of a single obligor cannot exceed 2.5% of total portfolio value.

# The Portfolio Management Process: The Pillars of Portfolio Management

- Credit Research
- Trading
- Relative Value Analysis
- Interest Rate/Yield Curve Analysis
- Risk Management
- Compliance

## **Credit Research**

- Focus on the future
- Improving/Stable/Declining
- Volatility of rating changes

## **Credit Research**

- Scenario analysis
- Diversification/correlation
- Work efficiently

## **Credit and Value**

Credit quality

- + credit trend
- + yield spread
- + liquidity

= Relative Value

# Trading

- Information Collection
- New Issues
- Secondary Market
- Workflow
- Selling

# **Trading – New Issue Calendar**

-Bloomberg (and S&P) display new issue deal calendar each week.

# **Trading – Secondary Breaks**

-A secondary break measures the basis point difference between a bonds original issue yield and first secondary traded yield.

# **Trading – Secondary Market Offerings**

-Bonds will then also be offered for sale in the secondary market after initial pricing.

# Selling Bonds – Bids-Wanted and Offerings

-Bond investors can put bonds out for sale and solicit a price via the bids-wanted process, or they can offer bonds at a defined price via a secondary offering.

## **Relative Value Analysis**

- Credit spreads
- Liquidity factors
- Diversification
- Optionality/callable bonds
- Market Discount Rule
- Double Tax Exemption
- Crossover trades
- Seasonality

# **Building Blocks of Bond Yield**

Bond Yield =

Real risk-free rate

- + Inflation premium
- + Term premium
- + Credit risk premium
- + Liquidity premium

## **Corporate vs. Treasury Yields**

-Yield Spread: Intermediate Corp Bond Index Yield vs. the 10yr Treasury yield

## **AAA Municipal Pricing Benchmark**

# **10yr Spreads to AAA Benchmark**

| Issuer/Rating                | Maturity | Coupon | AAA Yield | Traded Yield | Trade Date | Yield Spread |
|------------------------------|----------|--------|-----------|--------------|------------|--------------|
| Denton, TX ISD (NR/AAA/AAA)  | 2033     | 5%     | 2.61      | 2.97         | 7/10/2023  | 36           |
| Washington GO (Aaa/AA+/AA+)  | 2033     | 5%     | 2.45      | 2.63         | 7/25/2023  | 18           |
| New York City GO (Aa2/AA/AA) | 2033     | 5%     | 2.69      | 3.09         | 8/7/2023   | 40           |
| Georgia GO (Aaa/AAA/AAA)     | 2033     | 5%     | 2.51      | 2.51         | 6/27/2023  | 0            |
| Wisconsin GO (Aa1/AA+)       | 2033     | 5%     | 2.69      | 2.85         | 8/15/2023  | 16           |

## A-AAA Long Bond Credit Spread

-Showing the yield spread between Bloomberg's A vs. AAA long duration indices.

# High-Yield vs. High-Grade Municipal Yields

-Yield spread between intermediate high-yield municipal bond index and the 10-year AAA municipal bond.

### IL and NY State Index Yields & Credit Spread

-Showing movement in yields and yield spread between 2017 – 2Q23

# **Liquidity Factors**

- Rating/outlook
- Size of issue
- Size of holding
- Name recognition
- Structure
- Sector
- Age of bond
- Yield

# Selling Bonds – Bid to Ask Spread

Ask – price at which a seller is willing to sell

Bid – price at which a buyer is willing to buy

## Selling Bonds – Bid to Ask Spread

- PM puts a bond out for bid
- Dealers bid in competition
- PM sells to high bid or further negotiates sale price
- Dealer re-offers bond to other buyers at higher price

## Liquidity

#### -Showing changes in institutional vs. retail trading activity between 2021 – 2Q23

## **Diversification Across Municipal Sectors**

-Showing par and percent of total outstanding, by SECTOR, as of 2Q23.

# **Diversification Across Municipal States**

#### -Showing par and percent of total outstanding, by STATE, as of 2Q23.

# **Percent of Outstanding Par With Calls**

-As of 2Q23, 66% of total outstanding municipal par has a call date

## **New Issue Coupon Distribution by Quarter**

#### -Showing Re-Rise of 5% Coupon Structures

QoQ New Issue Coupon Distribution, <u>Tax Exempt Deals Only</u>: Showing % of Total Par Issued By Cpn Range

## **Option Adjusted Spread: CA GO Example**

# Market Discount (De Minimis Rule)

• The accretion of a bond purchased at a discount is subject to taxation. The tax applied may be capital gains or ordinary income, or a portion of both, depending on the size of the discount. The de minimis threshold = par - (0.25 X number of years to maturity).

# **Effect of Double/Triple Taxation**

-Showing yield advantage for CA resident buying in-State bond.

|                                       | Traded |                    |           | Yield for CA |

#### **FOMC Dot Plot: DOTS**

## **Historical CPI and Muni Price Responses**

-CPI a challenge for municipals. Data shows the period between 2022 – 2Q23

### **Nonfarm Data and Price Responses**

-Municipals have responded better to nonfarm

## **Historical FOMC and Price Responses**

-Municipal returns the 5-days following FOMC meetings.

# **Yield Curve Analysis**

## Municipal Yield Curve Slope: 2s/10s

#### **Municipal Bond BULLET Portfolio Example**

## **Municipal Bond BARBELL Portfolio Example**

## **Key Rate Duration**

- Measures the price sensitivity to changes in interest rates at particular points on the yield curve.
- As such, it is an improvement on duration because it takes into account non-parallel shifts in the yield curve.

### Convexity

Convexity

- Duration works for small changes in interest rates
- Convexity measures the sensitivity of a bond's duration to changes in yield.

Things to know:

- Convexity is generally your friend!
- Negative convexity is ok if your being paid enough for it may be useful in a stable i rate environment

## **Convexity, Duration and Callable Bonds**

**Convexity And Callable Bonds** 

## **Rolling Down Yield Curve**

- If curve is steep, returns can at times be improved by selling a bond that has "rolled down the curve" and replacing it with a longer maturity bond.
- The price of the bond actually rises at certain points when it rolls down the curve (if held to maturity it will eventually decline to par)

Example: A 10 year maturity bond bought at par with a 3.0% yield held for one year in an environment where rates are steady and the curve is steep (20 basis points between 9 and 10 year maturities).

Sell the now 9 year bond at a 2.8% yield, price of xxx. Reinvest in 10 year maturity at par with a 3.0% yield.

• Risks: Curve can flatten, extending duration (back to original target).

### **Risk Management**

- Risk Framework
- Risk Modeling
- Regulatory Management
- Performance Attribution

# **Risk Management: Framework & Modeling**

General Framework

- Rate risk
- Credit risk/Default risk
- Liquidity Risk

**Risk Modeling** 

- -> total return/LDI/capital preservation vs. benchmark
- translate into a set of metrics
  - correlations (credits and rates)
  - volatility
  - alpha/tracking error targets
  - scenario analysis

## **Regulatory Risk - Funds**

- Derivatives Risk Management Program (Rule 18f4)
- Liquidity Risk Management (Rule 22e4)

## **Performance Attribution Factor**

- Duration
- Curve
- Income
- Sector
- Security

### Compliance

- Client Guidelines
- SEC Rules and Regulations
- State Regulations

## **Client Communication**

"Transparency builds trust."

### **Taxable Municipals**

-Taxable municipal supply increased to ~20-30% of total in 2019 – 2021, but typically is closer to ~10-15% of total annual supply (or \$30 - \$50B/year).

<sup>\*</sup> Thru Apr. 2023

## Conclusion

-Putting it all together

- Research
- Trading
- Relative Value Analysis
- Interest Rate/Yield Curve Analysis
- Risk Management
- Compliance
